NEWS RELEASE

Saskatoon, Saskatchewan

July 31, 2006 – United Carina Resources Corp. (TSX Venture - UCA). Rick Walker, President, is pleased to announce that drilling has begun on its 50% owned gold property in the Laonil Lake area of Saskatchewan. The property is located less than three kilometres northeast of Claude's Seabee gold mine. The program will consist of at least 6 holes and will be managed by Claude Resources Inc., the operator and also owner of 50% of the property.

Shear structures with quartz veins and associated sulphides have been encountered in previous drill programs, with variable down-hole widths from 0.5 metres to 5 metres.

There is a tendency of stronger mineralization downward along the dip direction. The current drill program is designed to test the down dip extension and along strike extension of these shear structures and mineralization. Assaying will be done at the TSL laboratory in Saskatoon. Patrich Hannon, M.A. Sc., P. Eng., of Claude Resources is the Qualified Person for this project.

ON BEHALF OF THE BOARD

“Rick Walker”

**Rick Walker,
President**
